**Date of birth:** 13-07-1995

**LinkedIn:** <https://www.linkedin.com/in/pratibha-tiwari-2740a940>

I have been working in the IT industry for more than 6 years. My objective is to gain knowledge and focus on my goal, exploring innovative learning opportunities. I am active and attentive in all aspects with a positive outlook for every obstacle. Throughout my career I have worked on amazing web applications for various domains.

## Education

SSC (CBSE)	HSC (CBSE)	BE Computers (Pune University)
96%	93%	75%

## Experience

---

**Employer:** Equal Experts (Currently working since Aug-2022)

**Designation:** Senior Consultant

**Role:** Web Application developer.

- I have been part of migration of data from a legacy service so that we can master the data in the latest service.
- I have also worked in creating an application which is based on kotlin and google cloud infra which will help us to decommission the old services. We have exposed endpoints in this service where all the other teams can integrate and get data.
- Currently, I am working for a client where I am working on Web Application which manages the ecommerce product creation, sku creation, product update and sku update using SpringBoot framework, java 7 for backend and junit for testing. The project has a special requirement of creating oracle scripts to migrate huge data so that it can support the new architecture.
- I have worked on a migration script to migrate data from our application.
- I have also worked POC of creating an architecture to handle jobs and data update issue to fasten up the application.

**Employer:** ThoughtWorks (Mar-2019 till Aug-2022)

**Designation:** Consultant

**Role:** Web Application developer.

- Currently, I am working for a client where I am developing a Web application using React-Redux for frontend and using various other libraries like Ag-Grid, formik, yup for development. React testing library for testing purpose. For backend I am using SpringBoot framework, java 11 for backend and junit, test containers for testing.
- I have worked on integrating Box with our application.
- I have also worked in data migration where tables migrated from oracle DB to MySql using Sqllines tool and ETL operation in MySql DB using Pentaho tool.
- I have also worked on creating a GoCd pipeline for my application.

**Employer:** Bitwise Solutions (Jun-2017 to Feb-2019)

**Designation:** Programmer

**Role:** Java Web Application developer.

- In Bitwise I was working as a Java Web Application developer for Discover Cards. I have experience of creating web applications using jsp, servlet, Spring-mvc and Spring Boot where our application was deployed on WebSphere using Jenkins job.
- I have good web application infrastructural knowledge interaction between frontend, consumers, services and Database. I have experience of Web Application Security vulnerability analysis and troubleshooting.
- I have knowledge of SOAP and REST services where we used Soap-ui and postman for testing them respectively. I have knowledge of developing REST api incorporating swagger with them.
- I was part of the Agile team which works in a sprint having daily huddles and stand-ups.
- I have experience of working on git, Jenkins, nexus.

## Skills And Technologies

---

Jsp, Servlet, Spring MVC, Spring Boot, Html, css, GitHub, Gitlab, REST, SOAP, Jenkins, Postgres, Kotlin, ReactJs, Material-ui, CI/CD, Docker, Gocd, Redux, React Testing Library, Formik, Oracle, Kotlin, GCP, Gocd

I have good knowledge of Data structures, Algorithms, OOPs concept and object modelling. I am actively solving problems using various design patterns.
